API TESTING EXECUTION REPORT

Project Name: AAYAM Hub

Subsystem: Backend API Services Engine (Flask, SQLite, Redis)

Test Suite: Unit & Integration Test Suite (pytest)

Date of Execution: July 30, 2026

Status: ALL TESTS PASSED (29/29)

1. EXECUTIVE SUMMARY

This report documents the API test execution metrics and status regression analysis for the AAYAM Hub backend services engine. All endpoints connected to the landing page navigation, authentication, registration, script vault, stage bookings, and proposal submissions were tested.

Metric	**Value**
Total API Operations Scanned	29
Validated Operations in this Report	29
APIs in Full Execution Table	29
Bugs Identified Before Fix	2 (POST /api/join schema validation)
Bugs Remaining After Fix	0

Metric	Value
Fixed Bugs	2
Resolution Rate	100%

2. ENDPOINT EXECUTION DISTRIBUTION

Below is the comprehensive execution log for all tested API operations. Each test validates both the Accepted (Success) and Failing (Validation Error) paths.

#	API Operation / Button Action	Expected	Actual	Status
1	GET /api/health (Home / Logo)	200	200	PASS FIRST TRY
2	GET /api/members (Directory)	200	200	PASS FIRST TRY
3	GET /api/plays (Featured Plays)	200	200	PASS FIRST TRY
4	GET /api/open-positions (Casting)	200	200	PASS FIRST TRY
5	GET /api/events (Explore Events)	200	200	PASS FIRST TRY
6	POST /api/join (Missing Fields Validation)	400	400	PASS FIRST TRY
7	POST /api/join (Accepted Member Register)	200, 201	201	FAILED THEN FIXED
8	POST /api/login (Failing - Missing Fields)	400	400	PASS FIRST TRY
9	POST /api/login (Failing - Invalid Auth)	401	401	PASS FIRST TRY

#	API Operation / Button Action	Expected	Actual	Status
10	POST /api/logout (Failing - Missing Token)	400	400	PASS FIRST TRY
11	GET /api/profile/get (Missing Email)	400	400	PASS FIRST TRY
12	GET /api/notifications	200	200	PASS FIRST TRY
13	POST /api/notifications/mark-read	200	200	PASS FIRST TRY
14	GET /api/my-schedule (Missing Email)	400	400	PASS FIRST TRY
15	GET /api/my-auditions (Nonexistent User)	404	404	PASS FIRST TRY
16	GET /api/gallery (Media Showcase)	200	200	PASS FIRST TRY
17	GET /api/stage-bookings (Read Schedule)	200	200	PASS FIRST TRY
18	POST /api/stage-bookings (Book Slot CTA)	200, 201	201	PASS FIRST TRY
19	GET /api/revenue-metrics	200	200	PASS FIRST TRY
20	POST /api/proposals (Pitch Event CTA)	200, 201	201	PASS FIRST TRY
21	GET /api/proposals	200	200	PASS FIRST TRY
22	GET /api/sponsor-ads	200	200	PASS FIRST TRY
23	GET /api/audition-positions	200	200	PASS FIRST TRY
24	GET /api/financials	200	200	PASS FIRST TRY

#	API Operation / Button Action	Expected	Actual	Status
25	GET /api/financials/summary	200	200	PASS FIRST TRY
26	GET /api/maintainer/stats	200	200	PASS FIRST TRY
27	GET /api/scripts (Read Scripts)	200	200	PASS FIRST TRY
28	POST /api/scripts (Missing Title/Email)	400	400	PASS FIRST TRY
29	POST /api/scripts (Accepted Submit Script)	200, 201	201	PASS FIRST TRY

3. MISMATCH SUMMARY

This section details endpoint mismatches identified during initial testing before payload schema adjustments:

Case ID: MM-SCAN-001

- Endpoint: POST /api/join
- Expected Statuses: 200, 201
- Actual Status Before Fix: 400 Bad Request ({'error': 'Missing field: state'})
- Difference Summary: The test payload initially omitted the mandatory 'state'
  The location field is enforced by schema validation in api.py.

Case ID: MM-SCAN-002

- Endpoint: POST /api/join
- Expected Statuses: 200, 201

- Actual Status Before Fix: 400 Bad Request ({'error': 'Missing field: country'})
- Difference Summary: The test payload omitted the mandatory 'country' field required by the registration route.

4. FIXED ROWS LOG

Case ID	Endpoint	Status Before Fix	Status After Fix	Resolution
MM-SCAN-001	POST /api/join	Expected 201 / Got 400	Expected 201 / Got 201	FIXED
MM-SCAN-002	POST /api/join	Expected 201 / Got 400	Expected 201 / Got 201	FIXED

5. USER FEEDBACK & PLANNED IMPROVEMENTS

Primary System Users:

- Actors / Performers
- Stage Coordinators
- Maintainers / Production Directors

User Feedback Summary

- **Actors / Performers:** Requested real-time status updates in dashboards for script transitions (Draft to Pending/Public).
- **Stage Coordinators:** Requested instant verification feedback upon successful stage slot reservations.

- **Maintainers:** Suggested batch notification generation for new event pitches and sponsorship requests.

Planned Improvements for Next Sprint

- Implement real-time maintainer notifications for proposal submissions (POST /api/proposals).
- Develop automated workflow endpoints for script publishing approvals and rejections.

* Add automated script publishing workflow approval/rejection endpoints

(POST /api/scripts/<id>/approve-publish).
